Mirrors with holders

GLASS WITH HOLDER

Magneti Marelli product range includes glasses with holders for different types of passenger vehicles. All presented references in catalogue have heated element and holder. Also, You have possibility to choose different type of glasses

FLAT glasses – flat shape of glass. This type of product does not change the distance and decrease the driver's field of vision

CONVEX glasses - panoramic, convex shape of glass. This type of product Glass extends the driver's field of vision, the picture is slightly away. CONVEX mirror increases safety with respect to the flat mirror

ASPHERICAL glasses – panoramic glass with more curved shape. This type of product has two zones of vision and eliminates the blind field. Special zone is divided by line.
